

## Sixth Form

At sixth form the Maths Faculty offers the following options:

<b>For students with GCSE Maths grade:</b>	<b>Course</b>
7 or above	A Level Maths (Edexcel)
8 or above	A Level Maths & A Level Further Maths (Edexcel)
4 or above	Level 3 Core Maths (AQA)
3 or below	Functional Skills / GCSE Maths (AQA)

### How to pass your sixth form maths qualification

- Complete every question of every exercise. Practice really does make perfect.
- Make sure you are trying past paper questions before every topic assessment. The exam questions are often much harder than the textbook exercises. If you haven't tried exam standard questions before an assessment then you are setting yourself up to fail.
- Review your assessments – go through each assessment, making sure you understand exactly how you lost each mark. If you don't do this you will make the same mistakes every time.
- Read through the mark schemes thoroughly after practising past papers – you need to understand exactly what the examiner is looking for.
- Always show your workings, and where appropriate, units. A Level mark schemes award more marks for workings than for the final answer.
- Start a study timetable from day 1 – plan in time for private study in maths classrooms, as well as any other study time needed. Getting into a routine makes it much easier to get the work done.
- Ask your teacher for access to slide packs, revision resources and more.
